Reskilling Investment

Impact & Purpose: AI adoption is reshaping employment across countries, industries, and skill groups. In the current selection, 586,785 jobs are displaced while 296,355 jobs are created, leaving a net jobs impact of -290,430. Job creation offsets 50.5% of displacement, so the policy priority is to target reskilling where displacement is high and job creation is weak.

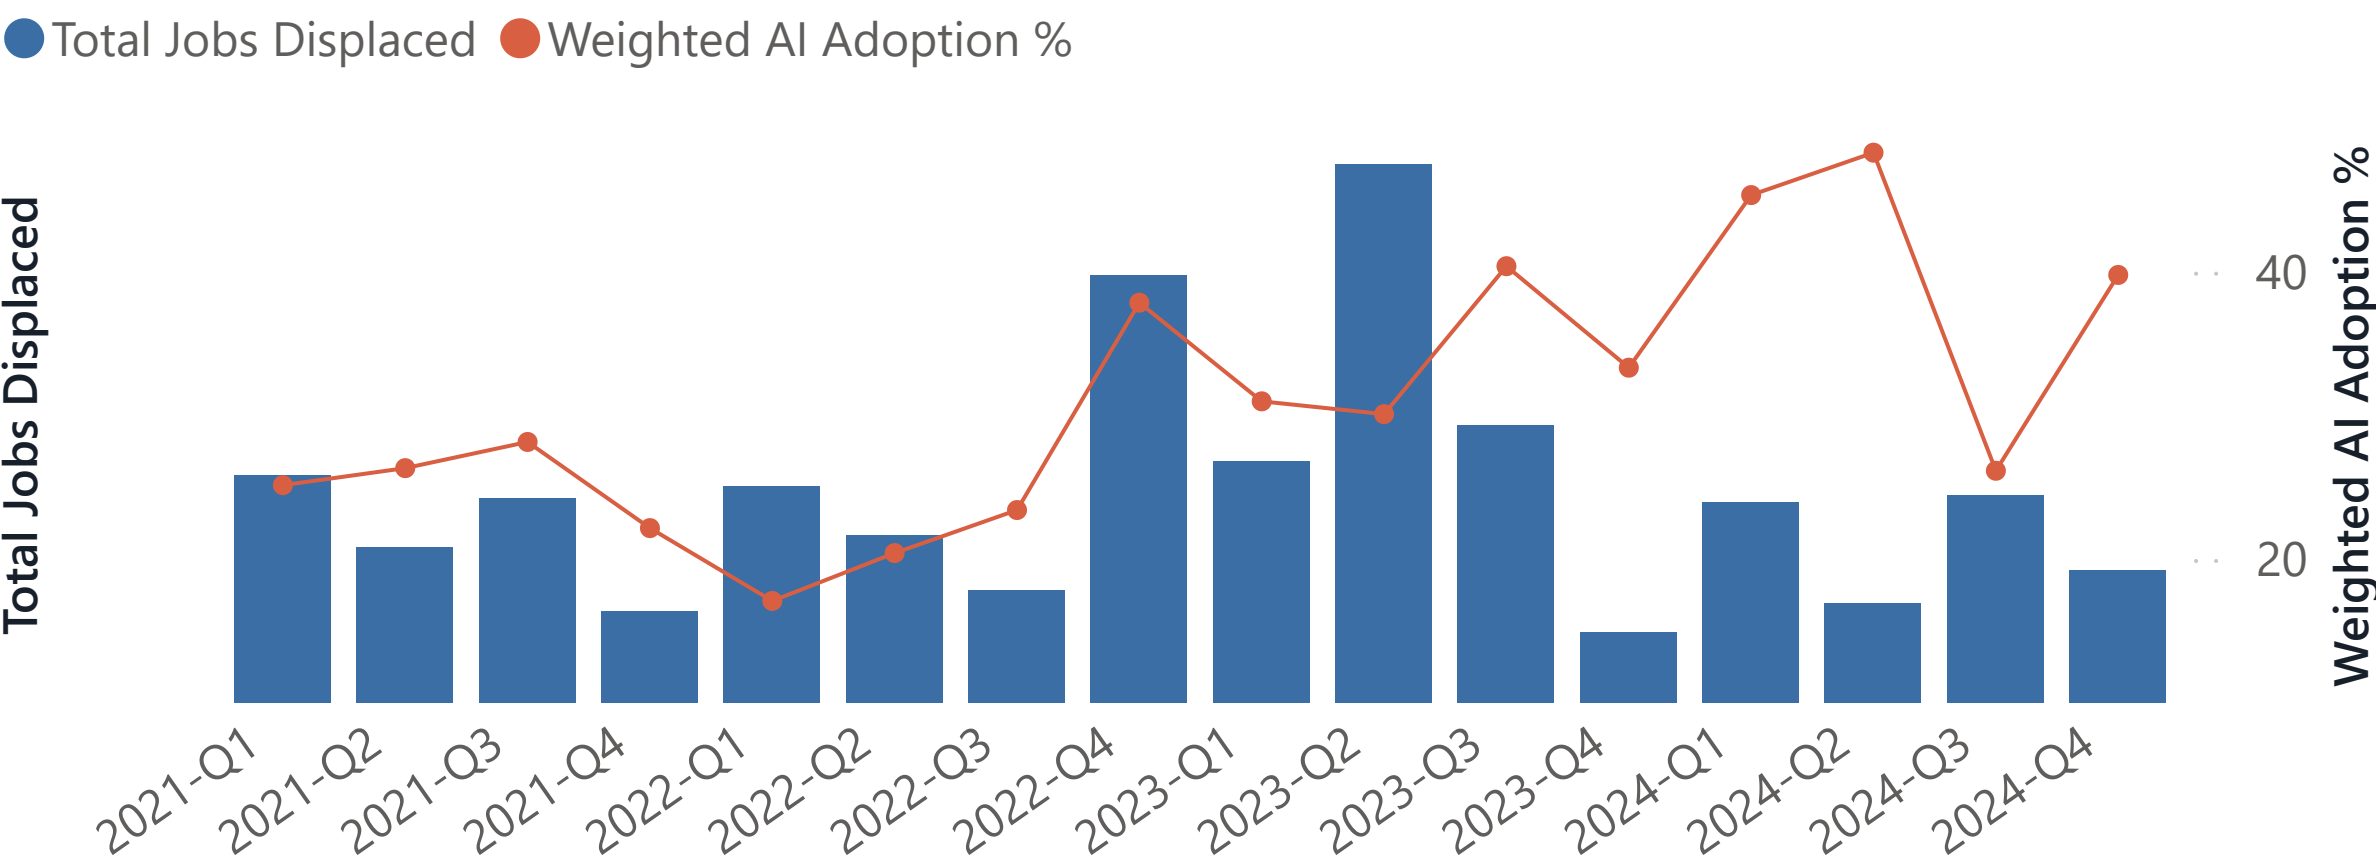

Recommendation: focus coalition funding on segments with high displacement risk, negative net jobs impact, and positive reskilling shortfall. Current selection shows risk 4.12, net jobs impact -290,430, and funding shortfall \$0.

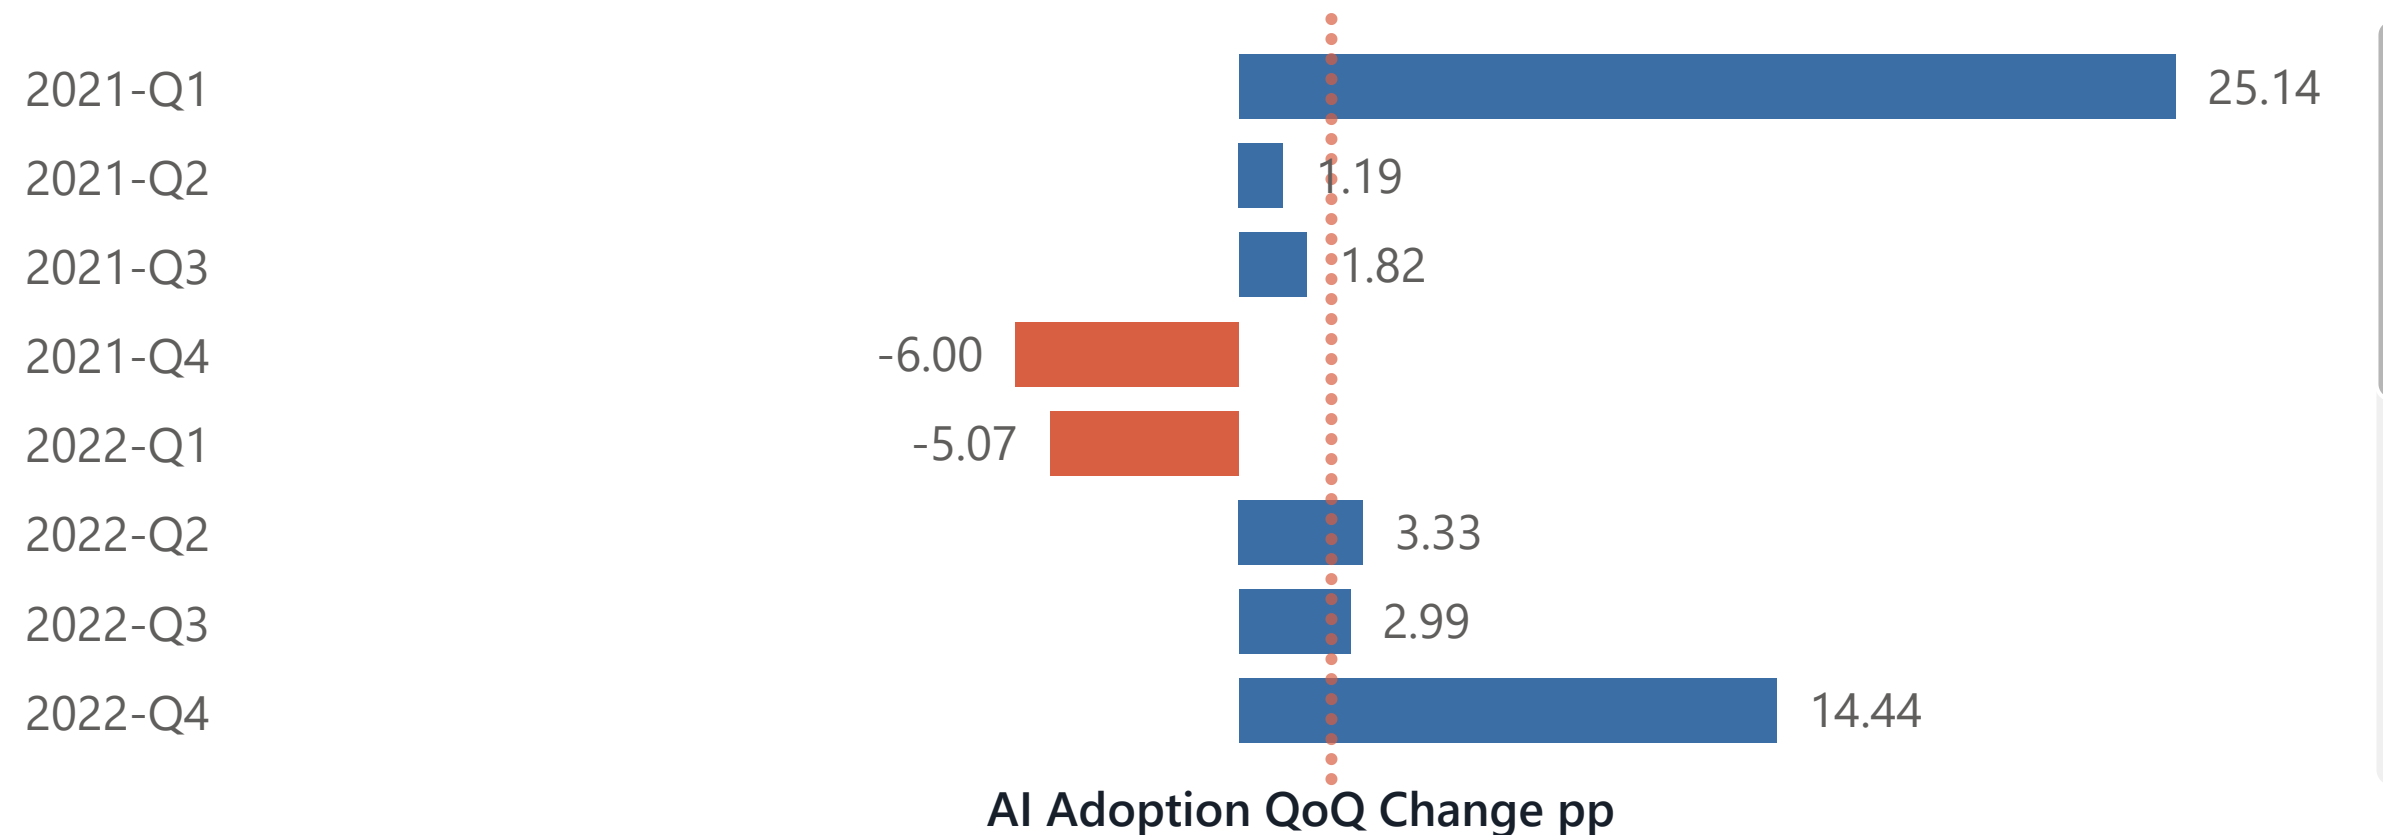

Generative AI shift: adoption increased from 23.4 to 35.3 after Q4 2022, a lift of 11.9 percentage points. Displacement changed by 86.9%, showing why the post-generative-AI period should be treated as a separate policy phase.

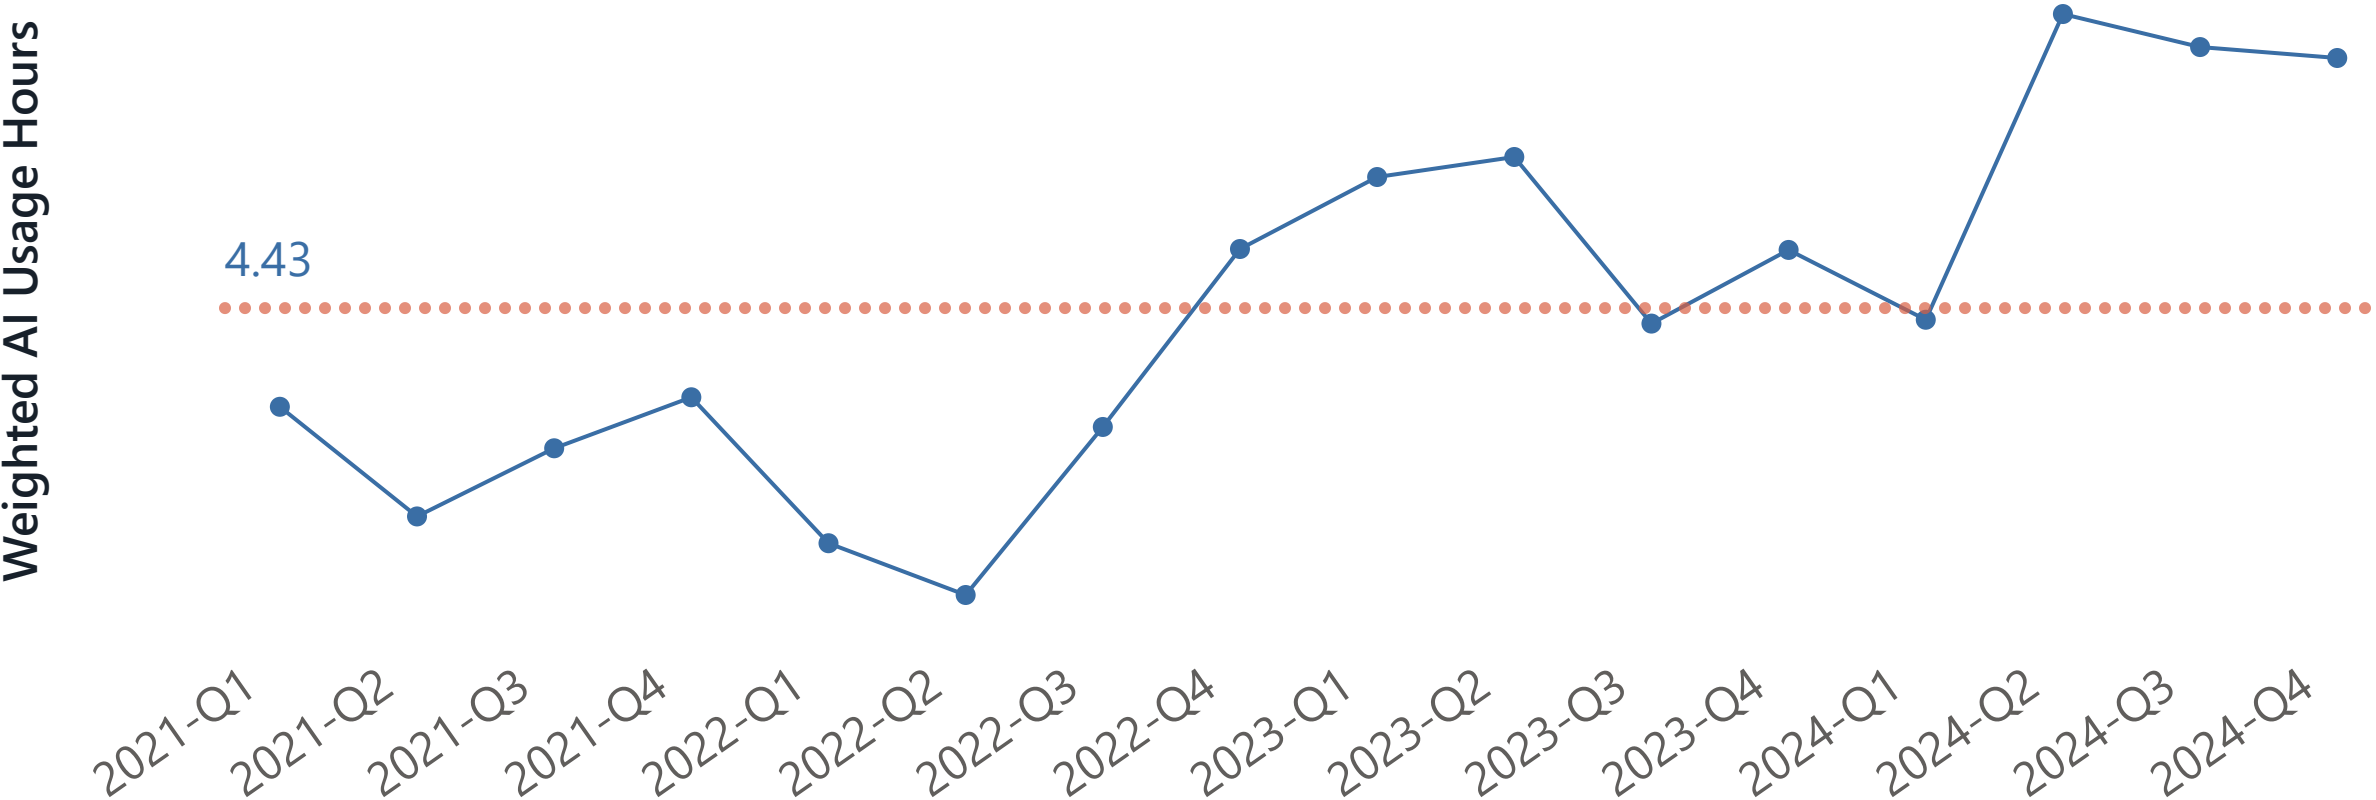

AI adoption and job displacement move together (correlation 0.07)

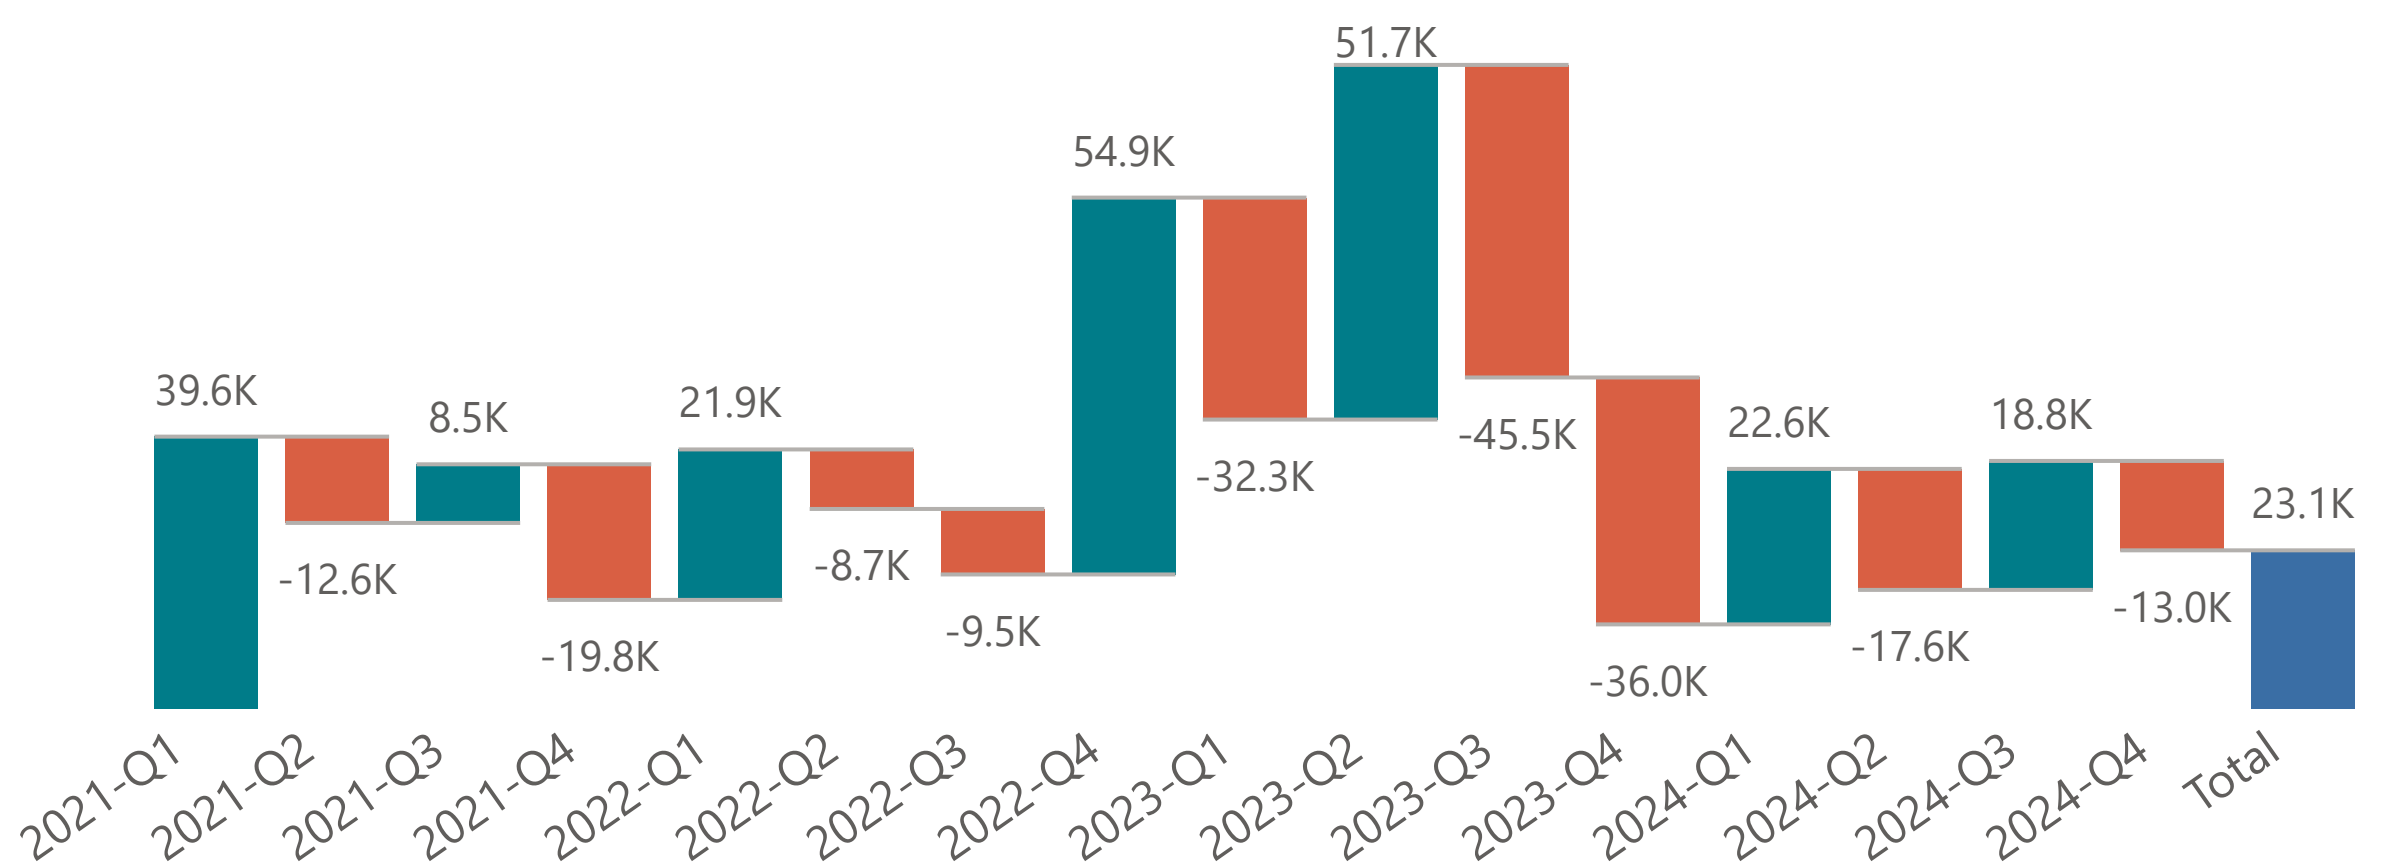

Adoption growth is uneven — swung from +25.1pp in 2021-Q1 to -22.1pp in 2024-Q3

AI tool usage up 117% since 2021, peaking at 7.4 hrs/week in 2024-Q2

Largest single-quarter jump: +54,888 jobs in 2022-Q4

Industry	Weighted AI Adoption %	Total Jobs Displaced	AI Adoption Shift (Gen - Pre) pp	Displaced Jobs Shift (Gen - Pre)
Aerospace & Defence	30.69	22,630	18.42	-3244
Agriculture	43.21	19,720	5.59	-1214
Automotive	26.17	40,852	1.05	21890
Construction	29.86	12,803	12.14	3457

Manufacturing	29.94	29,518	-16.45	14596
Marketing & Advertising	23.65	5,874	14.86	-1102

Skill reskilling priority: replaceability score is 43.3, augmentation potential is 64.7, exposure gap is -21.3, and median reskilling duration is 10.2 months. Prioritize high exposure-gap skills where reskilling time is long.

Reskilling gap: benchmark shortfall is \$0 and spend per displaced job is \$105.07. The risk-adjusted reskilling gap is 103.13. Prioritize segments with positive shortfall, high displacement risk, and low spend per displaced job.

Highest replaceability + longest reskilling time: Manual Skilled Trades — top priority for early reskilling investment

Manual Skilled Trades carries the highest displacement risk (4.70) among all skill categories

Funding mismatch: Manual Skilled Trades has the highest displacement risk but gets only \$30.98 per displaced job — far below Creative & Design, the best-funded category

Skill Category	Replaceability Score	Augmentation Potential	Skill Exposure Gap	Median Reskilling Months	Total Jobs Displaced
Cognitive & Analytical	20.90	93.10	-72.20	19.60	57,617
Managerial & Strategic	29.10	65.70	-36.60	7.60	74,970
Creative & Design	39.60	74.00	-34.40	9.70	44,666
Manual & Physical	36.90	66.10	-29.20	14.90	91,444
Administrative & Clerical	48.40	66.30	-17.90	8.20	84,319

Country policy readiness: digital infrastructure score is 65.3, STEM graduates per 100K are 1,660, weighted displacement risk is 4.12, and job offset ratio is 0.51. Strong readiness with weak job offset indicates a need for faster labor-market transition support.

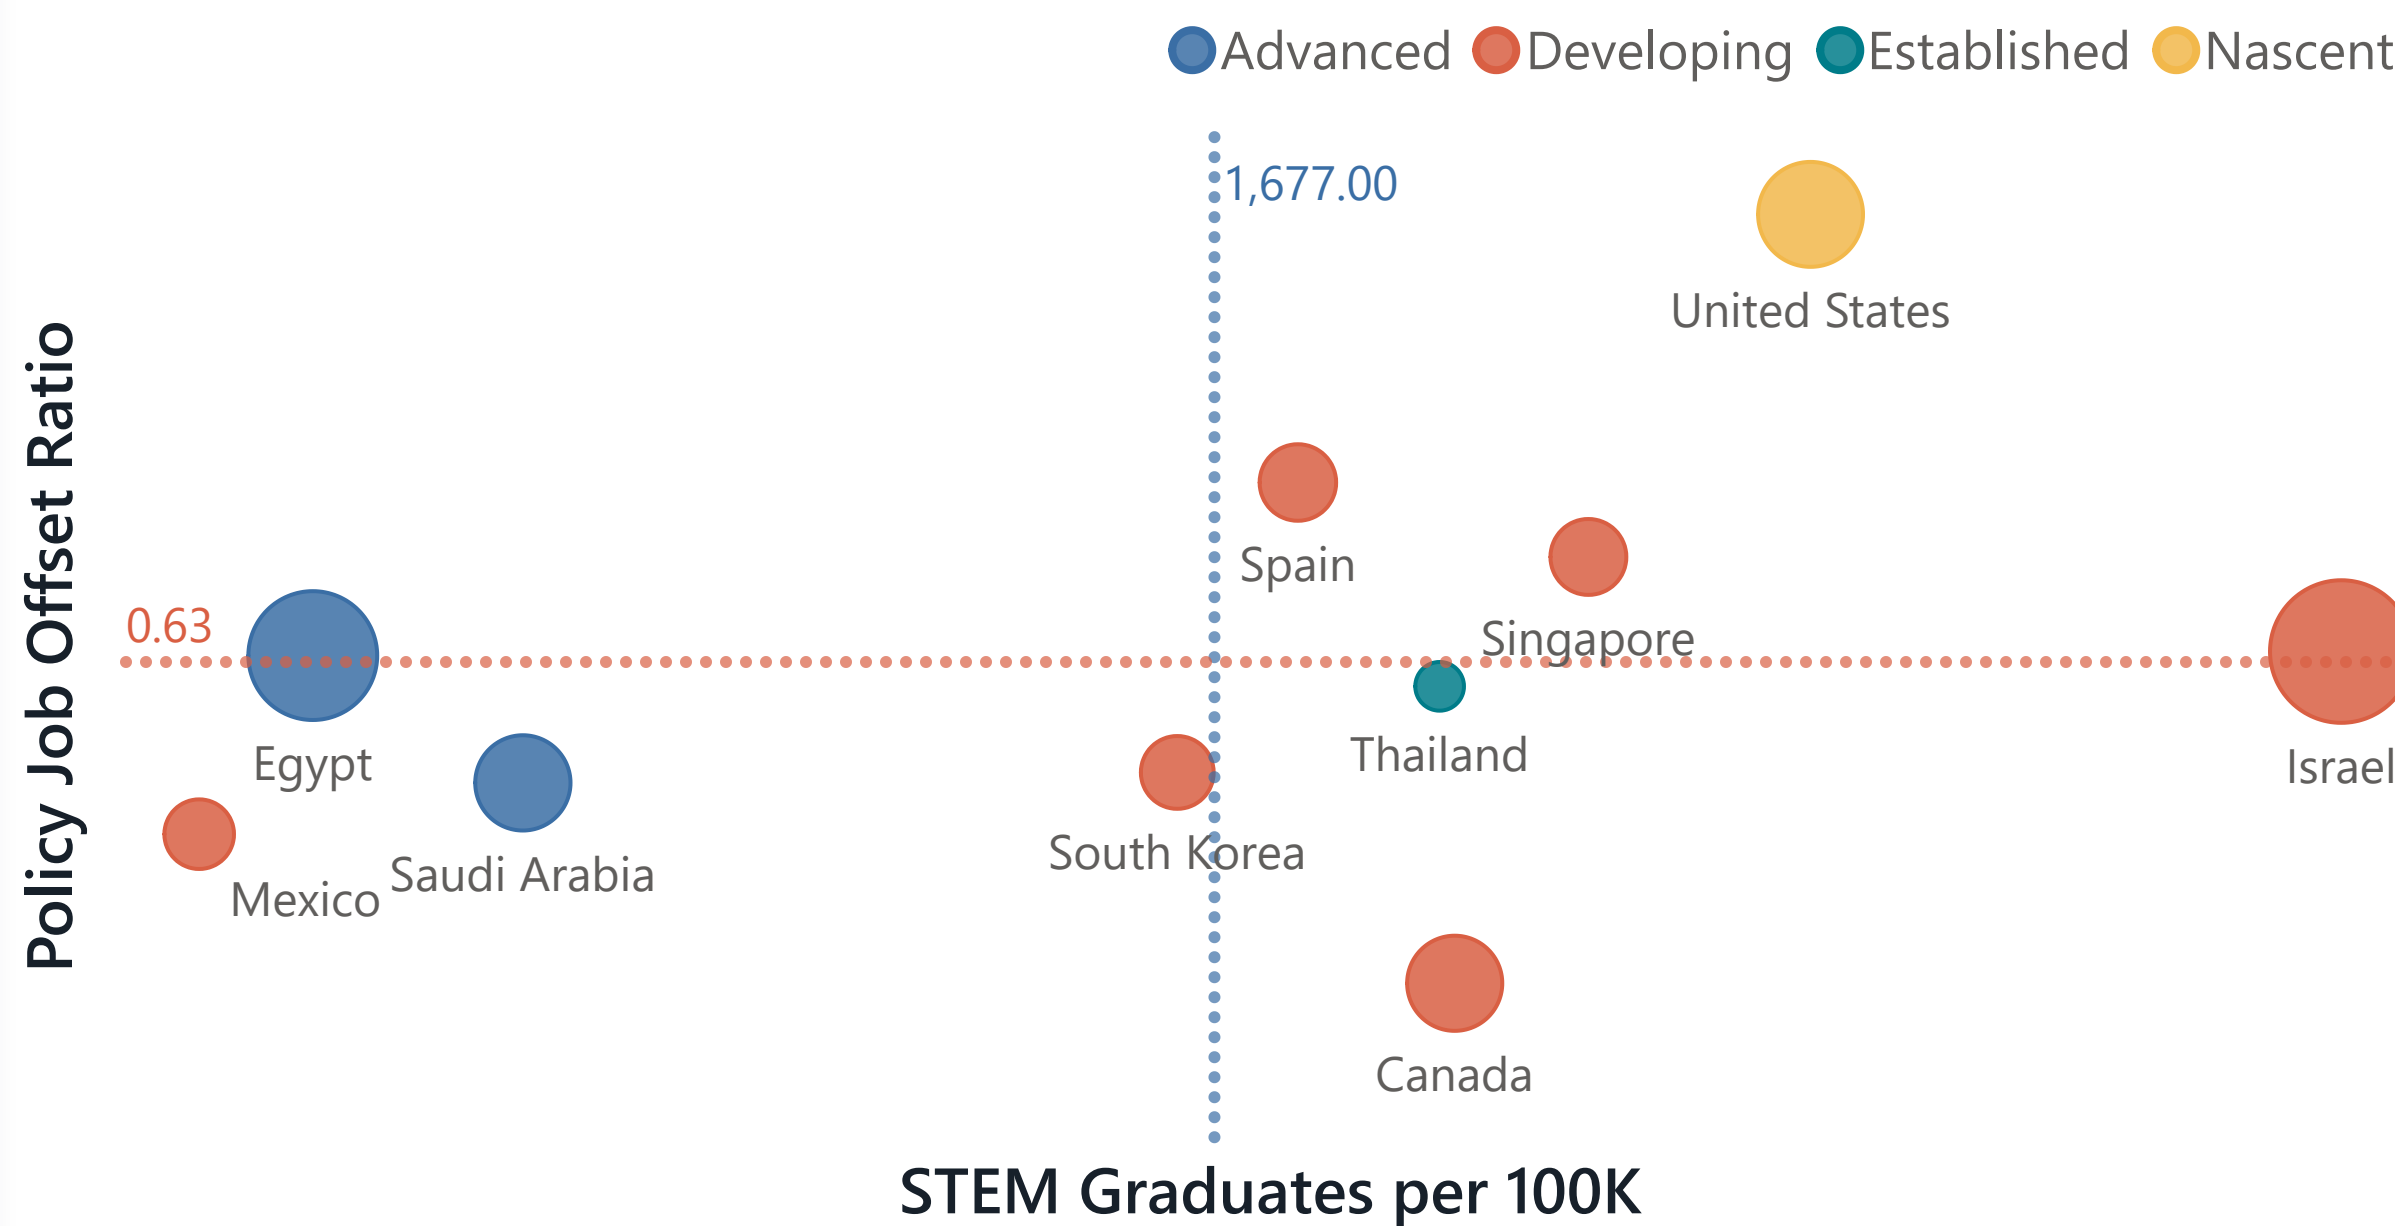

Global Distribution of AI-Driven Job Displacement

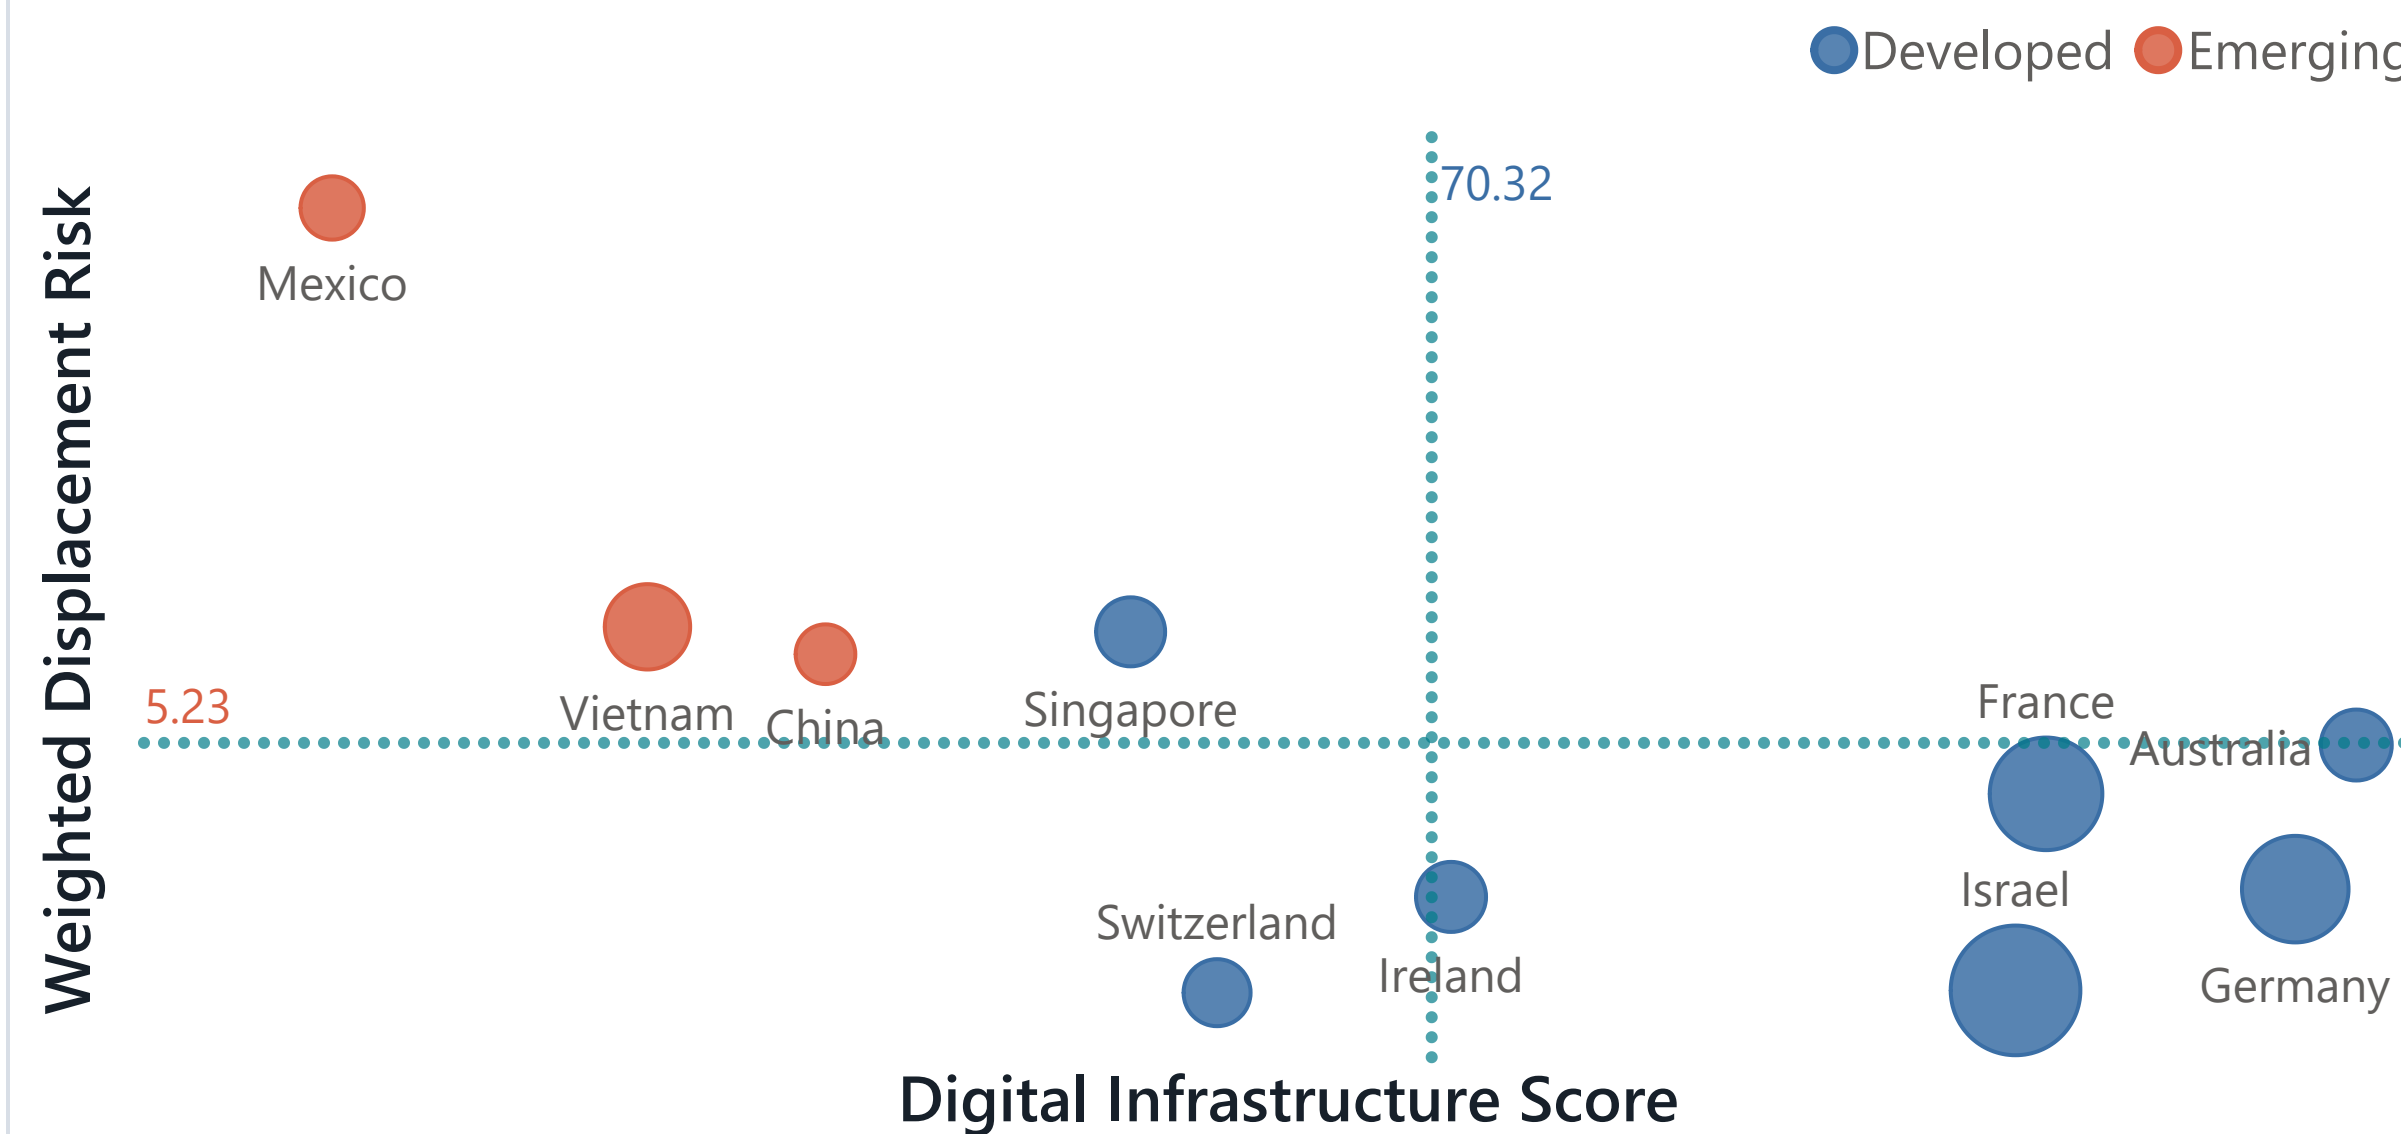

Widest Developed-vs-Emerging adoption gap: North America (+26.8 pp)

Job offset ratio vs STEM talent supply (correlation with risk: -0.21)

Displacement risk vs digital infrastructure (correlation -0.68) — more digitally-ready countries see LOWER displacement risk

Country	Weighted AI Adoption %	Weighted Displacement Risk	Job Creation to Displacement Ratio	Spend per Displaced Job	Country Risk Rank
Mexico	26.60	6.46	0.61	\$137.81	1
Vietnam	24.22	5.49	0.35	\$120.38	2
Singapore	34.13	5.48	0.65	\$124.37	3
China	32.24	5.43	0.41	\$65.81	4
Australia	31.45	5.22	0.44	\$52.52	5
France	43.27	5.11	0.38	\$47.71	6
Germany	26.71	4.89	0.55	\$33.50	7
Ireland	34.18	4.87	0.55	\$74.92	8

Actionable insight: monitor closely and prioritize targeted reskilling because displacement risk is moderate-to-high and job creation does not fully offset losses. Current spend per displaced job is \$105.07.
